SUMMARY

I am Rohan Ul Hasan Najmi, a Full Stack Web Developer dedicated to mastering state-of-the-art technology. Currently thriving in a remote role at a Canadian AI company, I am deeply involved in developing Albis, an innovative AI Virtual Assistant. My expertise spans from responsive front-end development using Next.js and MUI to engaging with cutting-edge AI features, ensuring both robust functionality and captivating user experiences. My proactive approach and continuous learning ethos drive me to deliver exceptional results in fast-paced, technology-driven environments.

PROFESSIONAL EXPERIENCE

Full Stack Developer
Genie AI Inc. | July 2024 - Present

- Developing and maintaining high-quality front-end features for an AI-driven platform using Next.js, ensuring seamless user interaction and visually appealing design with MUI (Material-UI).
- Implementing responsive and accessible UI components using MUI, enhancing user engagement across various devices and platforms.
- Contributing to the creation of a unique virtual avatar feature, leveraging AI technologies to provide interactive and personalized user experiences.

Full Stack Developer Intern
Genie AI Inc. | March 2024 - June 2024

- Completed a three-month internship focusing on front-end development, gaining hands-on experience with Next.js and MUI within a professional AI-driven environment.
- Assisted in the integration of front-end and backend services using Nest.js, gaining insight into full-stack development processes and challenges.
- Developed proficiency in using version control systems like Git, facilitating effective team collaboration and source code management.

Full Stack Developer Intern
IOT Software and Solutions | November 2023 - January 2024

- Participated in code reviews and team meetings, acquiring skills in code quality assurance, project management, and agile methodologies.
- Contributed to the testing and debugging of new features, enhancing product reliability and performance under the guidance of senior developers.
- Employed modern JavaScript and CSS techniques to improve front-end performance and ensure compliance with web standards.
